Performance Package Includes:

### Revo Technik Stage 2 Performance Software

This is the latest generation of the 2.0L Turbo engine from VAG. The engine has so much torque, power is instantaneous and available throughout the entire rev-range. It is such a flexible engine. The MKVI R feels so much stronger than you'd expect, overtaking comes easily, it's rapid. There are three performance options on the GTi 2.0 TSi software, a 95ron, 98ron and a 200ron. 08ron is the optimum setting to use in good climatic conditions with 97/9i8ron, with huge increases in both power and torque over standard and the 95ron performance.

**Stage 1 Power Increase 154Kw to 205Kw Torque to 425Nm on 98RON Fuel.**

**revo<sup>2</sup>**

Revo Stage 2 compliments performance exhaust and air intake combinations to give 10-15% more power over standard Revo performance software.

### Milltek Sport Turbo-Back Exhaust

200CPSI High Flow Cat & Big Bore Downpipe  
Connecting Pipe  
Centre Exhaust Non-resonated  
Dual outlet silencer connecting pipe GT  
100mm Tips

### aFe Stage 2 Cold Air Kit

This Stage 2 sealed cold air intake produces 14hp, 15lbs x ft torque. Enclosed in the durable 16 gauge, powder coated heat shield, this air intake system features long transition intake tube, built-in MAF sensor pad, a washable/reusable 360 degree conical Pro R5 air filter for maximum airflow, increased horsepower, torque, throttle response and provides an aggressive yet stealthy style.
